CUSTOM SOFTWARE & APPS

Better systems.
More possibility.

Custom software, mobile applications and operational tools shaped around your users, processes and business goals.

WHAT WE CAN HELP WITH

01 **Custom business software**

Applications and dashboards designed around specific operational requirements.

02 **Mobile applications**

iOS, Android and cross-platform options selected to fit the product and users.

03 **ERP & GST workflows**

Discuss billing, invoice records, reporting and business modules with your team and tax adviser.

04 **Automation & integrations**

Connect systems through APIs and simplify repetitive steps where suitable.

FIND THE RIGHT ENGAGEMENT

A scope that fits your business.

For businesses with manual workflows, disconnected systems, a new app idea or a need for clearer operational information.

01 **Discovery & product definition**

Clarify user journeys, core features, integrations and priorities before implementation.

02 **Focused first release**

Deliver an agreed set of useful features before considering broader functionality.

03 **Operational platform & evolution**

Plan larger modules, integrations, maintenance and future improvements in stages.

HOW WE GET STARTED

Understand your goals / Agree the scope / Deliver and review / Plan what is next

Tell us about your requirements through the Contact page on the UltraNxt website. Include your goals, priorities and approximate timeline.

Security, data handling, compliance requirements, platform accounts and deployment responsibilities must be defined for the project. GST and accounting requirements should be reviewed by your tax adviser.
